

The model 133 performance is enhanced with the fitting of a set of automatic cutters, which are adjustable for optimum performance. The new Model 133 is a lighter, stronger, and moves standards up even further, by reducing the need for operator skill. It allows for more uniformity between splices with its automatic simplicity.

The 133 joins a vast range of yarns. It can join high- or low-twist, S-twist or Z-twist on one chamber. Even S-twist to Z-twist, wool to cotton, glass to tyre cord. It is also used to splice Spandex, creating a smaller, stronger knot.

Product Specifications

Splice format: Ends together

Yarns: Spandex, Nylon, Polyester, low & medium count natural fibres

Yarn counts: Nm .7 to 200, 10 to 1500 tex

Twist: Any twist direction & level. S to Z twist.

Spandex

Nylon & Polyester

Dense Polymer Construction Heavy metal parts & bad seals are a thing of the past through the use of our durable polymer construction. Using industrial 3D printing technology, our simplistic design minimizes moving parts for a better splice.

Durable Lasts longer & maintains better seal integrity than bulky, metal splicers. All air flow is fully enclosed with dense polymer, eliminating problems with bad seals.

Low Maintenance Simplistic design affords easy maintenance & longevity with our splicers. Air chambers can easily be changed out if damaged or different size is needed. Our precise, automatic cutting allows our blades to last months without needing to be switched out. Try our guarantee offer & see for yourself.

Handle options

All Airbond splicers have the option of coming with or without the handle. Depending on your needs, we can adjust the size or eliminate it. Pictured here is the 133S no handle.

Air Timer Box

If the length of air blast is critical, Airbond has a Timer Box for all our splicers. This helps reduce operator error and ensures the quality of every splice.

Interchangeable Chambers

All Airbond splicers have interchangeable chambers for different size denier/tex. You no longer need a different splicer for each size range, reducing your costs. Easy to change out. The 133 splicer has 3 chambers available (small, medium, & large).

Mounting Solutions

We offer multiple methods. Our hanging assembly includes built in hanger & mounting hook for a secure mount. Our new mounting magnet allows the splicer to be placed anywhere. Reducing time, frustration, & risk of dropping.
